ROSES

Those who have used our roses in the past are well aware of the high quality of the plants we send out. The beginner would do well to start out with strong, thrifty bushes, such as we offer, keeping in mind that success with roses depends upon constant cultivation with the proper amount of plant food and generous watering when necessary. Keep constantly on the alert against insects and disease.

Ami Quinard. H. T. This is the most popular dark red rose, the buds opening into a semi-double fragrant flower of velvety crimson-maroon. 75c each.

Autumn. H. T. Burnt-orange and red. Notable for its strikingly rich fall bloom. 75c ea.

Betty Uprichard. H. T. Delicate salmon-pink flowers with a suggestion of carmine. Fragrant. Its popularity as a pink rose is well deserved. 75c each.

Caledonia. H. T. Full double flowers of pure white borne on strong canes. If you are looking for a good white rose, try Caledonia. 75c each.

Charles P. Kilham. H. T. Brilliant orange flowers suffused with glowing scarlet. 75c ea.

Christopher Stone. H. T. A new scarlet rose of unusual brilliance, the growth is vigorous and upright. The delicious fragrance of the blooms, together with size and excellent keeping qualities, assure great popularity for this rose. \$1.00 each.

Condesa de Sagato. H. T. Reddish copper inside with rich gold reverse. The striking flowers are borne on vigorous branching plants. An unusual rose which is sure to make many friends. 75c each.

Dainty Bess. H. T. Single. This is the most popular of all single roses, having five broad petals of soft rose-pink and wine-colored stamens. This lovely rose has a charm all its own, and deserves a place in every garden. 75c each.

Dame Edith Helen. H. T. Large, double, pink flowers of perfect form held on strong stems. A winner at many exhibitions. Sweet-scented. 75c each.

Duquesa de Penaranda. H. T. A beautiful flower described as cinnamon-peach or copper-apricot. The fragrant flowers are held on strong, upright growth, making it a splendid variety for cutting. 75c each.

E. G. Hill. H. T. Free flowering, dazzling red, shading to dark crimson. 75c each.

LOUISVILLE LAWN MIXTURE

This blend of fine-leaved grasses with White Dutch Clover is recommended for use in reseeding established lawns, patching thin spots, and for seeding newly graded yards where a permanent stand of Kentucky Blue Grass is desired. Ready for cutting after 30 days of good weather. This seed should be broadcast evenly to avoid a patchy appearance.

For New Lawns. The soil should be well prepared, and Bone Meal or Sheep Manure should be well incorporated with the soil. Seed should be sown at the rate of 1 pound for every 300 square feet, selecting a time when there is no wind. After sowing, roll or rake lightly.

For Old Lawns. Bare spots should be vigorously roughed with a steel rake. An application of SHEEP MANURE will act as a stimulant to patches lacking plant food. Scatter the seed as evenly as possible, then rake or roll lightly.

Several sowings are better than one. Do not risk all your seed at one time. The seed may be washed away by a downpour of rain immediately after planting. A good plan is to sow a part of your seed walking East and West—the next time walk North and South, in this way assuring an even distribution. Very good success can be had from scattering seed on a soft snow. In spring it is well to rake out all dead grass before sowing.

Use Grass Seed Generously. Where lawns are kept in neat condition, the plants do not produce seed as Nature intended. This deficiency must be supplied by an occasional seeding.

Prices: 1 lb., 40c; 3 lbs., \$1.10; 5 lbs., \$1.75; 10 lbs., \$3.25.
